~~Sample~~ Pedestrian Access Route Transition Plan

City of [*city name*] ***Carroll***, Iowa
[*date approved*]

Overview

The goal of the Americans with Disabilities Act (ADA) Transition Plan is to ensure that the City creates accessible paths of travel in the public right-of-way for people with disabilities.

The City evaluated the pedestrian circulation paths for pedestrian accessible route features within the public right-of-way as required by the Americans with Disabilities Act (ADA) and its implementing regulations (28 CRF 35) and Section 504 (49 CFR 27). The evaluation included, but was not limited to, sidewalks, curbs, curb ramps, the portion of the street surface in the crosswalk area, pedestrian signals, and elevators or lifts provided in the public right-of-way and was based on the requirements in Chapter 12 of the ~~Iowa Department of Transportation (Iowa DOT)~~ ***Statewide Urban Design and Specification (SUDAS)*** Design Manual, ~~effective [*date*]~~ ***2016 Edition***.

On the basis of this information, this ~~transition plan~~ ***Transition Plan*** outlines the steps the City will take to provide new, or upgrade existing, pedestrian access route features as required by the ADA and its implementing regulations. The pedestrian access route features will be constructed or reconstructed to meet the requirements in Chapter 12 of the ~~Iowa DOT~~ ***SUDAS*** Design Manual, effective at the time of letting or at the time of construction if using City forces.

Inventory

This inventory is based on our evaluation of all locations where no curb ramps are provided at the intersection of existing sidewalks and public streets; where non-compliant curb ramps, sidewalks, and other features exist; and where existing features are in poor condition. Features may include, but are not limited to, sidewalks, curbs, curb ramps, the portion of the street surface in the crosswalk area, pedestrian signals, and elevators or lifts provided in the public right-of-way. The evaluation was completed [~~*month*~~] ***April*** of [~~*year*~~] ***2016*** and will be updated every [~~number~~] years. ~~See Exhibit 1.~~

Priorities

Curb ramps, sidewalks, and other features will be installed or reinstalled in the locations identified on the ~~Pedestrian Access Route Inventory~~ ***pedestrian access route inventory*** according to the following priorities:

~~1. State and local government offices and facilities (city hall, public schools, public library, etc.)~~
~~2. Public transportation facilities (bus stops, train stations, etc.)~~
~~3. Places of public accommodation (central business district, public recreation areas, etc.)~~
~~4. Residential areas~~

These pedestrian access route features may be constructed at the time of the roadway or pedestrian project, even if they are identified as a lower priority in this transition plan. The cost of this work will be paid for using funds allocated for the roadway or pedestrian project.

Implementation Plan and Schedule

The City will implement this ~~transition plan~~ ***Transition Plan*** based on the number of pedestrian access route features identified in the ~~Pedestrian Access Route Inventory~~ ***pedestrian access route inventory***, the estimated cost of those features, and the funding levels identified above. ~~The following implementation strategy will be used:~~

MEMO TO: The Honorable Mayor and City Council Members

MEMO FROM: Dick Hierstein, City Manager

SUBJECT: Sidewalk inspection program

Recent decision of the Iowa Supreme Court have greatly increased the need for a city sidewalk inspection program. Liability can be decreased by a regular program of inspection and repair.

It is proposed that such a program be implemented by our Building Inspector. The city would be divided into three areas with one area inspected each year.

The attached standards are suggested to determine if repair or replacement would be required. Standards vary among cities. Generally, repair code "A" is less restrictive than many cities which allow only 1/2" vertical edge.

The inspection procedure would involve several steps:

1. After an initial inspection, an informal repair notice would be left at the home. The notice would state the nature of the defect and the necessary corrective action. The sidewalk area to be repaired would also be marked with spray paint. This notice would ask that repair be made within thirty days to avoid the more expensive official repair procedure. A voluntary assessment form would be attached in case the owner wanted the city to conduct the repair.

2. A followup inspection would occur in thirty days.

3. If the necessary repair had not been made, we would determine the owner of the property. Then official repair notification by certified mail would take place. Again, thirty days would be allowed for the repair to be done.

4. A second followup inspection would take place.

5. If the necessary repair still had not been made, the city would have the repair performed. All costs of the repair including inspection, notice and assessment schedule costs would be assessed against the property.

Although we estimate that 5% or less of the sidewalks in town will require repair, complaints can be anticipated. However, the program is necessary to keep our sidewalks in safe condition.

Options to the program are:

1. Do nothing
2. Eliminate the informal first step
3. Adopt an ordinance making failure to maintain the sidewalk a misdemeanor

Doing nothing would expose the city to the full liability opened by the Supreme Court. This option would also subject the public to preventable hazards.

Elimination of the informal first step could speed up the repair process in some cases. It would save staff time in those cases where the informal notice would not get the problem corrected. However, the legal format of the official notice would offend many persons who would comply with a less formal request to improve pedestrian safety. In cases where the informal notice obtained the desired repair, it would involve much less time and expense (researching ownership and sending certified notice).

Some cities have made the failure to repair sidewalks a misdemeanor. Charges can be filed until the necessary repair is made. This has also been done in conjunction with our basic repair procedure.

RECOMMENDATION: The full sidewalk inspection procedure, including an informal notice, be approved.
