Carroll County Solid Waste

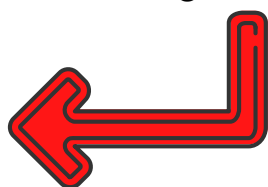

*Batteries are hazardous waste and belong in the
Hazardous Waste Program, not in the trash.*

Except Alkaline: they can safely go in the trash.

Batteries explode and cause
fires when crushed. We
crush everything at the
landfill & recycling center.
Significant increase of fires
at the landfill are directly
linked to batteries.

Carroll County Solid waste is proud to partner with
area businesses to provide convenient and safe
battery disposal opportunities for your household
batteries. Collection containers can be found at the
following businesses.

Hazardous Batteries:

- All Lithium & Lithium-Ion
- Nickel/Metal Hydride (Ni-MH)
- Mercury & Silver Oxide
- Nickel-Cadmium (Ni-Cad)
- Lead Sulfuric Acid
- All Rechargeable Batteries
